World-class facility

Alan B. Miller Hall is an asset to the College and the community. Miller Hall will be a destination point for students, scholars, leaders, and thought leaders from around the world. State-of-the-art technology is aligned with comfort and ease of use, with an eye toward maximum flexibility for future advances.

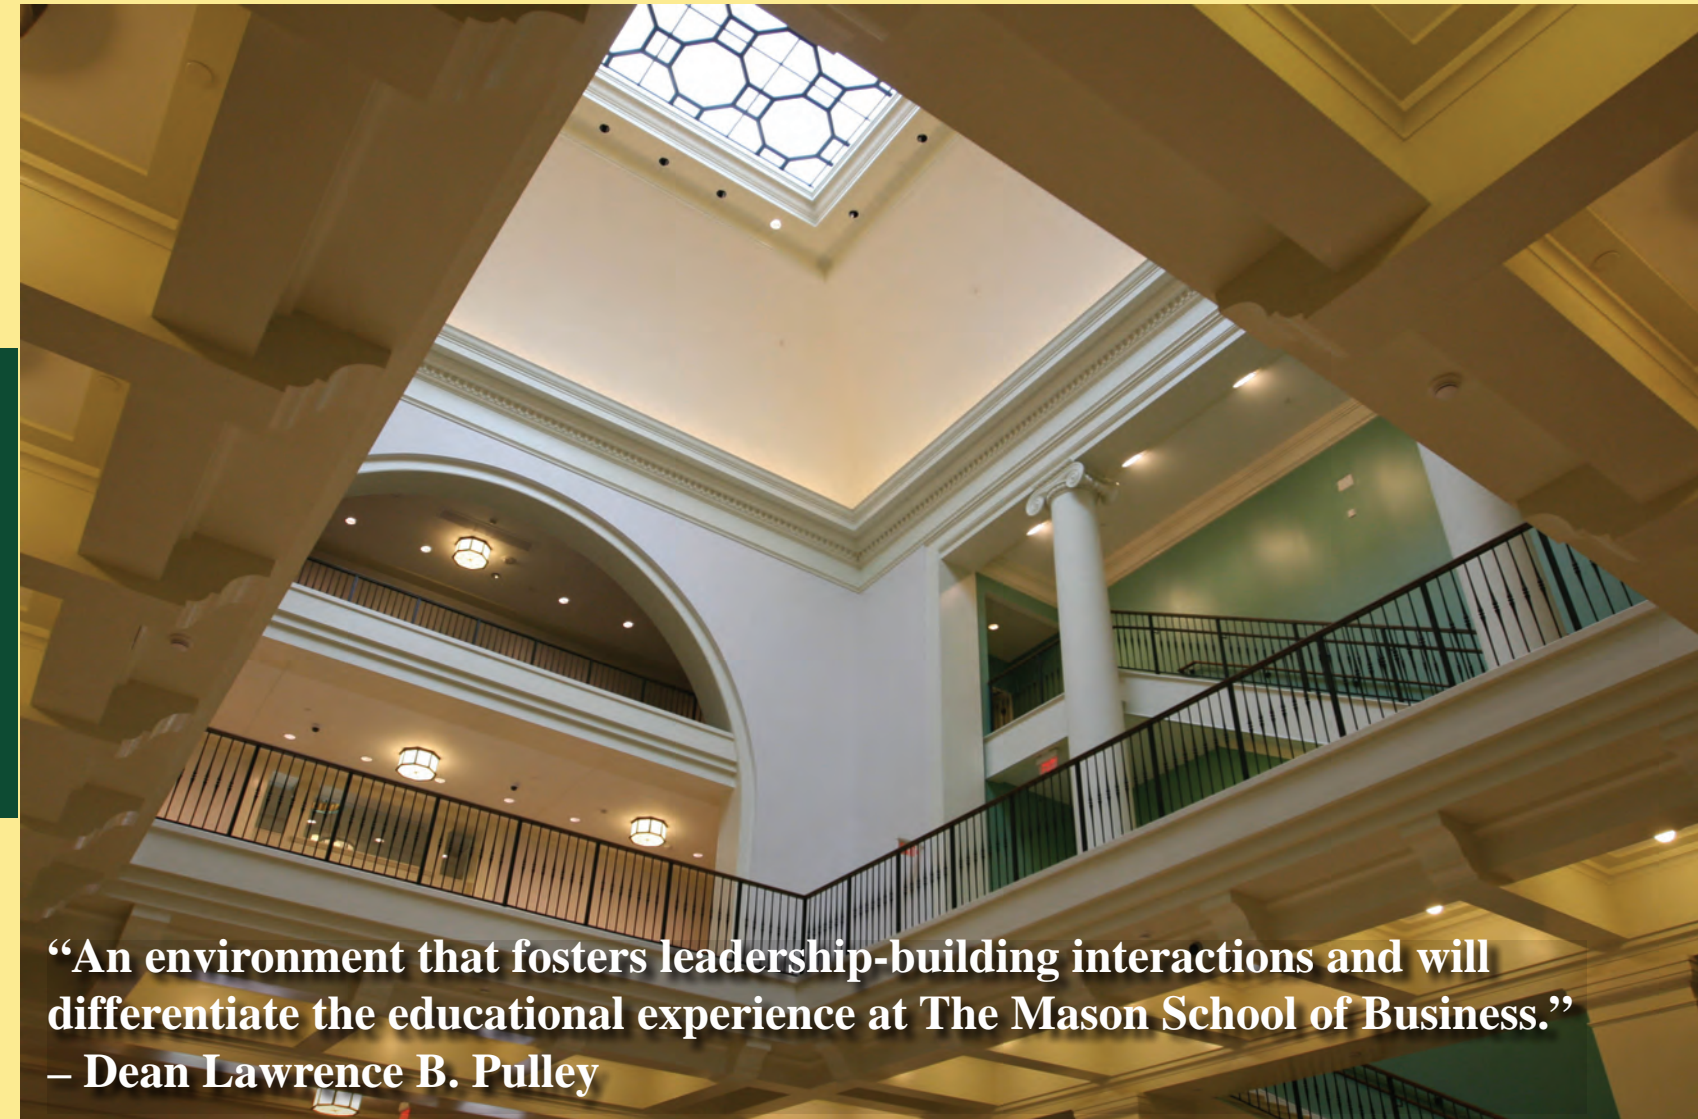

Western Gateway

Alan B. Miller Hall is the perfect architectural bookend to the Sir Christopher Wren Building on the College's eastern side. We now have two great halls on campus anchoring the eastern and western gateways to the college. Both spaces convey a sense of permanence and a commitment to the future of a university that has set its sights on greatness.

Sustainable

Alan B. Miller Hall both embodies and frames the College's aspirations in building sustainability. From the earliest planning and design stages, the Mason School of Business has pursued LEED certification from the U.S. Green Buildings Council.

Alan B. Miller Hall

“An environment that fosters leadership-building interactions and will differentiate the educational experience at The Mason School of Business.”
– Dean Lawrence B. Pulley

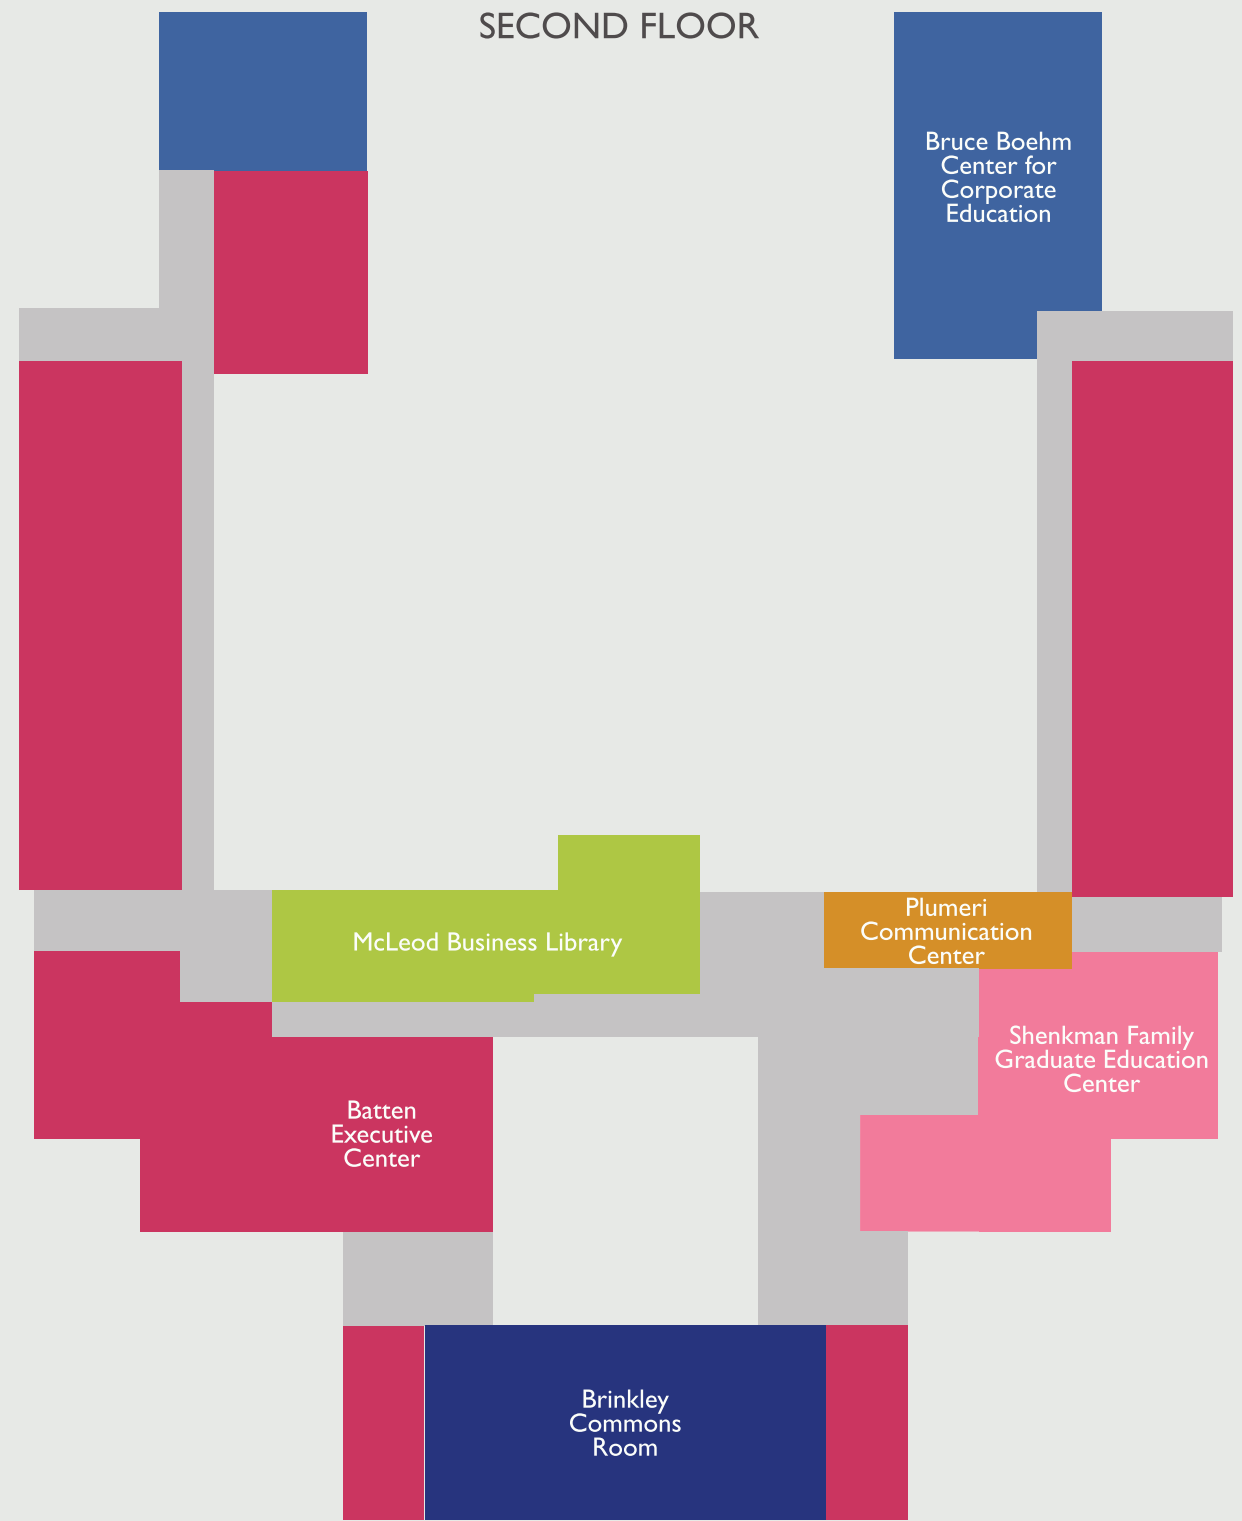

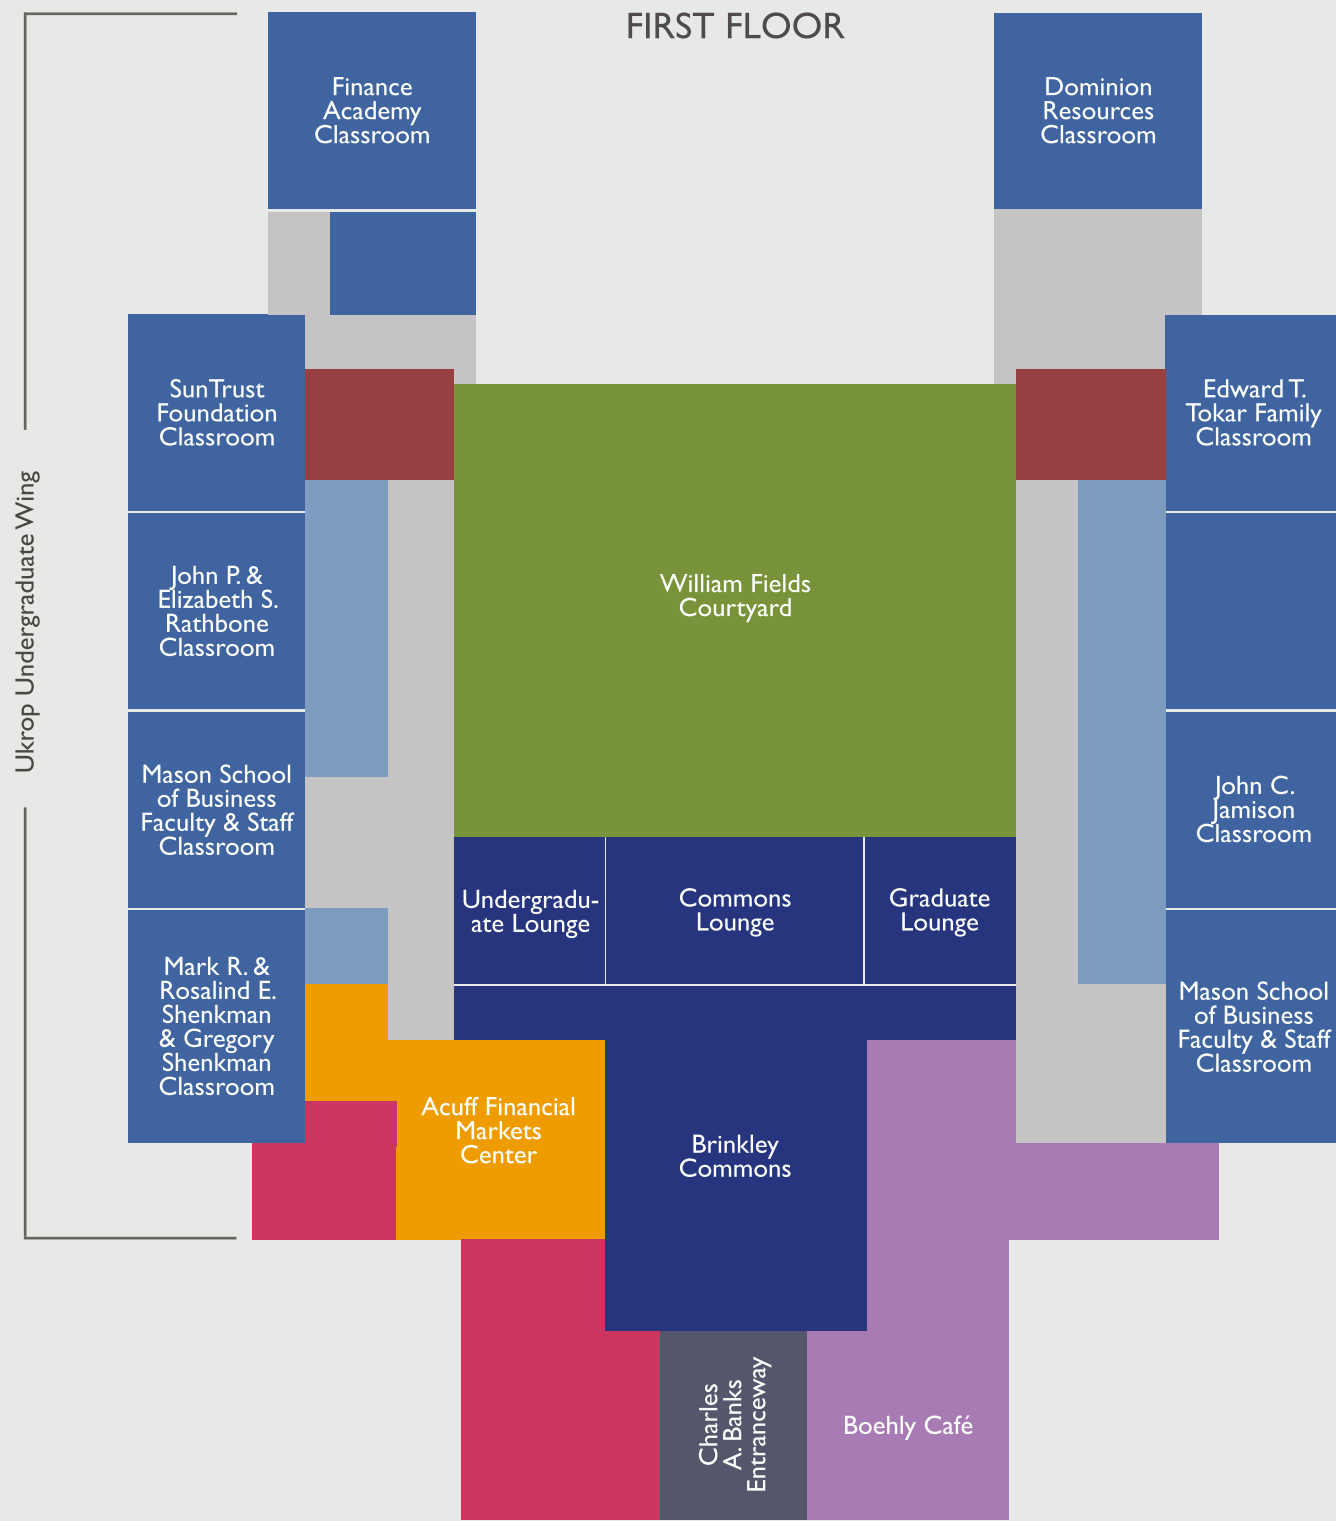

Alan B. Miller Hall is a symbol of the enduring spirit of William and Mary. The same entrepreneurial spirit that built W&M, the alma mater of a nation, is exemplified in Miller Hall, the home of the Mason School of Business – a place of vision, community and innovation for graduates with the leadership skills, core values and boldness to build a new, responsible, and sustainable global economy.

You are invited to the public dedication on October 2, 2009 at 2 p.m.
